

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	31 January 2025
Project Name	Employee Raise Issue – Record Producer & Service Portal Widget
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

10 minutes to prepare
1 hour to collaborate
2-8 people recommended

→ **Before you collaborate**

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

10 minutes

[A] Team gathering
Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

[B] Set the goal
Think about the problem you'll be focusing on solving in the brainstorming session.

[C] Learn how to use the facilitation tools
Use the Facilitation Superpowers to run a happy and productive session.

1 Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

5 minutes

PROBLEM

How might we enable employees to raise workplace issues (payroll, access, infrastructure, HR policy) through one Service Portal form that captures standard data, routes each issue to the right team and shows its status end to end?

Key rules of brainstorming

To run a smooth and productive session

Stay in topic.	Encourage wild ideas.
Defer judgment.	Listen to others.
Go for volume.	If possible, be visual.

Step-2: Brainstorm, Idea Listing and Grouping

2 Brainstorm

Write down any ideas that come to mind that address your problem statement.

10 minutes

TIP You can select a sticky note and hit the pencil [switch to sketch] icon to start drawing!

Team Member 1

Custom scoped app "Employee Center" in Studio

Custom table "Employee raise issue"

Auto-number field, read-only

Team Member 2

Fields: Requester, Category, Subcategory, State

Priority: Critical / High / Medium / Low

Assignment group (reference to user group)

Team Member 3

Category → Subcategory dependency (Network → VPN, Hardware → Laptop)

UI Policy: short description mandatory

State choices: New, In progress, Resolved, Closed

Team Member 4

Record Producer "Raise Employee Issue" on the custom table

Map variables to table fields

Publish in the Service Catalog

Team Member 5

Dedicated Employee Center Service Portal

Portal page "Employee Center Portal Page"

Left widget: services & support information

Team Member 6

Right widget with "Raise Issue" button

Client script opens Record Producer via sys_id

Add both widgets to the portal page

Team Member 7

Test dependent dropdowns & mandatory rule

Submit a test issue, verify record on the table

Preview the page & widgets on the portal

Team Member 8

Notification on every state change

SLA timers & escalation

Manager dashboard, KB suggestions & chatbot

3 Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

20 minutes

TIP Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mural.

Build a scoped app and custom table for employee issues

Custom scoped app "Employee Center"	Custom table "Employee raise issue"	Auto-number field, read-only
Requester, Category, Subcategory, State fields	Priority: Critical / High / Medium / Low	Assignment group reference

Enforce business rules and dependencies

Category → Subcategory dependency	UI Policy: short description mandatory	State choices: New to Closed
-----------------------------------	--	------------------------------

Let employees raise issues through a Record Producer

Record Producer "Raise Employee Issue"	Map variables to table fields	Publish in the Service Catalog
--	-------------------------------	--------------------------------

Present everything on a dedicated Service Portal

Employee Center Service Portal	"Employee Center Portal Page"	Left widget: services information
Right widget: "Raise Issue" button	Client script opens Record Producer	Add both widgets to the page

Validate the solution and plan enhancements

Test dropdowns & mandatory rule	Submit test issue, verify record	Preview page & widgets
Notification on state change	SLA timers & escalation	Dashboard, KB suggestions & chatbot

Step-3: Idea Prioritization

4 Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes

Importance – If each of these tasks could get done without any difficulty or cost, which would have the most positive impact?

Feasibility – Regardless of their importance, which tasks are more feasible than others? (Cost, time, effort, complexity, etc.)

TIP Participants can use their cursors to point at where sticky notes should go on the grid. The facilitator can confirm the spot by using the laser pointer holding the H key on the keyboard.
