

Customer Journey Map: Employee Raise Issue Portal

Employee Raise Issue Portal										
SCENARIO		Entice	Enter		Engage			Exit	Extend	
Raising, routing and resolving a workplace issue		How does someone initially become aware of this process?	What do people experience as they begin the process?		In the core moments in the process, what happens?			What do people typically experience as the process finishes?	What happens after the experience is over?	
Steps	What does the employee typically experience?	Employee runs into a workplace issue (payroll, access, infra, HR)	Opens the Employee Center Service Portal	Views left widget with service information	Clicks "Raise Issue" widget	Fills Record Producer: category, subcategory, description	Submits the form	Sees confirmation the issue was created	Checks status later	Issue resolved & closed by HR/IT
Interactions	What systems or people do they interact with?	Intranet link, colleague word of mouth	Employee Center portal page, left & right widgets		Record Producer form, dependent dropdown, UI Policy			Confirmation message, Employee raise issue table	Planned "My Issues" widget & notifications	
Goals & motivations	What is the employee's goal at this step?	Help me find a way to report this quickly	Help me see what services are available		Help me describe my issue accurately, without confusion			Help me feel confident my issue was actually logged	Help me know when it's resolved, without asking	
Positive moments	What works well?	Portal is easy to find from the intranet homepage	Clean, simple homepage with clear categories		Dependent dropdown narrows choices quickly	Mandatory field stops incomplete submissions		Immediate confirmation message on submit	Issue is trackable in the table by category & state	
Negative moments	What is frustrating or slow?	Some employees still default to emailing HR out of habit	Unclear where to click the first time		Some categories have no exact subcategory match			No email confirmation sent yet	No self-service status view for the employee yet	
Areas of opportunity	How might we improve this step?	Promote the portal more visibly during onboarding	Add a short walkthrough for first-time users		Add an "Other" subcategory with free text			Add automatic email / notification confirmation	Build "My Issues" widget with live status & notifications
